PROFESSIONAL (OR PROJECT) EXPERIENCE

SOCIALIGA

Junior Frontend Web Developer

LAGOS/ NIGERIA

March 2022– Present

I recently worked on a vendor web app designed for product vendors to post and share their products for end users to order from. I collaborate with a team of fellow developers to ensure that products are delivered efficiently with high standard on time for end users, giving seamless workflow.

Project 1

- Transformed a template vendor web app into a react app which consumes API from the backend
- User registration with OTP authentication.
- Collaboration with a team of backend Engineers to develop a user login page (increasing user's interaction with the site)
- Vendors Web App for vendors to posts products, edit posted products, get orders from users, and show total revenue in a sophisticated and efficient User Interface.

Project 2

- Collecting user feedback from on an existing website
- Understanding the codebase to develop new solution for the issues pointed out by users
- Writing well detailed documentation on the new solution developed
- Rolling out the new solution and receiving positive feedback from users.

TL CONCEPT

IT Administrator

LAGOS/ NIGERIA

July 2018 – December 2021

I was involved in administering solution to malfunctioning computers, networks and advising the business owner the best solution, the correct hardware and software to purchase. Since I joined in 2018, the company has increased in number of monthly revenue and customers, resulting in an increase in office space to twice the size it was before I joined the company.

- Contacting the right vendor to get the correct and efficient hardware
- Formatting malfunctioning computer, installing the correct software and returning the computer to the state it was before crashing
- Organizing file backup and administering the correct security requirements
- LAN interconnection of computer to communicate with a central server sharing resources (e.g printer, scanner, files) amongst each other while maintaining fast and secure data transfer.

LEADERSHIP EXPERIENCE

TL CONCEPT

Head System Administrator

LAGOS / NIGERIA

September 2020 – December 2021

- I am consulted first to give advice on the right software and hardware to purchase
- I was in charge of training computer enthusiast the basics of computer and networking
- I work closely with the business owner passing directives to other subordinates.
